

Submission to Bind in Less Time  
Cutting-Edge Insurance Automation

# General Overview

SelectsysTech is a versatile insurance automation platform designed for digital distribution and seamless workflows across all P&C insurance products.

## Rate, Quote, Bind Platform

Quickly receive and process accurate submission data with real-time rating and instant approvals, significantly reducing the time from submission to policy binding.

## Selectsys Max & Hub

Automate administrative tasks and streamline underwriting workflows, enhancing operational efficiency and minimizing manual effort throughout your organization.

## AI OCR Technology

Utilize advanced AI-driven data extraction for accurate and efficient document handling, reducing manual data entry and improving overall data quality.

# How We Can Help

## Workflow Automation

3 hours saved per issued policy

## Underwriting Link

Enhance Underwriting Precision

## Business Growth

Doubled premium growth in GL and Comp without increasing headcount

## AI OCR Technology

90% reduction in data entry time

## Real-Time Rating

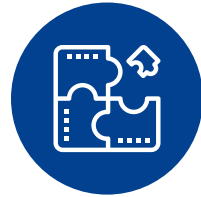

Less than 3 minutes per quote reduced from over 30 minutes
